+91 9839706161 | maitraanirban25@gmail.com | [LinkedIn](#) | [Github](#) | Raebareli, India

Data Science professional and IIT Jodhpur M.Tech postgraduate with 1+ years of experience engineering scalable Machine Learning, Deep Learning pipelines and Generative AI systems for global clients. Proficient in Python, SQL, PyTorch, Machine Learning Techniques and Statistical Modeling to design and optimize high impact AI solutions. Skilled at collaborating across technical and business teams to translate complex data problems into automated, deployment-ready systems.

SKILLS

Languages: Python | C++ | SQL

Data Science & ML: Statistical Modeling | Hypothesis Testing | Regression | Classification | Clustering | Decision Trees | Boosting (XGBoost) | NumPy | Pandas | Scikit Learn | Feature Engineering | PyTorch | TensorFlow

Generative AI: LLMs | Agentic AI | RAG | Fine-Tuning (SFT, LoRA/QLoRA) | LangChain | LangGraph | MCP | Vector DB

Tools & Cloud: Git | GitHub | FastAPI | Docker | AWS

Soft Skills: Problem Solving | Stakeholder Management | Executive Communication | Leadership

PROFESSIONAL EXPERIENCE

Turing Global India Pvt. Ltd.

June 2025 – July 2026

Data Scientist

- Reduced manual trajectory-capture effort by 60% as measured by automation-driven time savings by designing and deploying internal automation tooling, including Pygame-based viewport interfaces and VM orchestration, for the SFT data-collection pipeline.
- Standardized QA criteria and resolved cross-team measurement inconsistencies as measured by consistent performance scoring across teams by leading a team through the reconciliation of differing interpretations of task correctness with a client stakeholder team.
- Enabled consistent, scalable benchmarking of AI models as measured by testable, measurable evaluation criteria by designing evaluation frameworks and correctness-validation criteria from ambiguous, unstructured evaluation questions.
- Improved agentic reasoning performance to a 52 Artificial Analysis Score (IFBench: 62, TauBench: 68) as measured by benchmark scores matching Gemini 2.5 Flash on single-GPU inference by authoring and validating high-quality SFT datasets targeting tool-use and multi-step reasoning on a 15B-parameter LLM.
- Increased model reliability across ambiguous evaluation scenarios as measured by closed performance gaps by applying structured, hypothesis-driven testing to tool-use trajectories.

PROJECT WORKS

AI Customer Call Sentiment Analyzer

[Link](#)

Tech Stack :- Python, OpenAI API (Whisper, GPT-4o-mini), Streamlit, Pydub

- Built pipeline using OpenAI Whisper API and GPT-4o-mini to transcribe and score customer call sentiment with full conversational context.
- Designed modular architecture with structured JSON output and escalation alerts; shipped interactive Streamlit dashboard for real-time review.

Enterprise Document Intelligence RAG Agent

[Link](#)

Tech Stack :- Python, LlamaIndex, Qdrant, OpenAI API, Git

- Built a GenAI agent to parse, index, and answer complex queries from unformatted PDF and markdown documents, applying LLM-based retrieval to extract meaningful insight from unstructured text at scale.
- Configured a Qdrant vector database to optimize semantic search latency and engineered error-handling for API rate limits and token costs, improving reliability during heavy document-ingestion workloads.

Credit Card Transaction Fraud Detection

[Link](#)

Tech Stack :- Python, XGBoost, Scikit-Learn, Pandas, Statistical Modeling

- Built an XGBoost classification model on a highly imbalanced dataset (0.17% fraud rate), improving fraud identification from 75% to **98%** with a **0.99 AUC score**.
- Optimized precision/recall trade-offs to align the operating threshold with business risk tolerance.

EDUCATION

Degree	Discipline	Institute	Year
M.Tech.	Artificial Intelligence	Indian Institute of Technology, Jodhpur	2025
B.Tech.	Computer Science and Engineering	Dr. A.P.J. Abdul Kalam Technical University	2021

ACHIEVEMENTS

- Secured 96.5 percentile in Graduate Aptitude Test in Engineering (GATE) CS/IT, 2023
